

Pulley Bearings

Pulley bearings correspond in design to a sealed Double-row Angular Contact Bearing. Based on their function as Pulley Bearings the outer ring is reinforced.

Product Features

- Shields ZR: sheet steel discs
 Seals RSR: made of nitrile rubber reinforced with an embedded steel disc
 Re-greasable through the inner ring
 Outer ring can be cylindrical or crowned

Benefits

- Contact seals provide excellent protection against the ingress of dirt, reduce wear on the raceways and ball surface, reduce noise, vibration and the danger of lubricant failure
 Accomodate radial and axial forces in both directions
 Transfer of tilting moment possible
 Other bearing variants available on request:
 Outer and inner ring: diameter, width, threads etc.
 Contour options: crowned, gothic etc.
 Special seals

Condition Description

- Contamination
- Lubrication

Industries

- Food and Beverage
- Machine Tools
