

Silver-Lube® Mounted Units

NSK's Silver-Lube® series is a range of corrosion resistant bearing units specifically for use in industries where frequent thorough washdowns are necessary, optimum hygiene standards are required and good chemical resistance is important over a wide temperature range.

Product Features

- High grade stainless steel bearing-rings, cage & balls, seal core & grub screws, grease nipple & bolt hole liners.
- Nitrile rubber seals and stainless steel flingers.
- Thermoplastic polyester resin housing; plastic end covers available.
- Factory filled with a wide temperature USDA H1 food grade grease.
- Silver-Lube® is available in four different geometries

Benefits

- Resistant to cleaning agents and chemicals thus resistant to corrosion & peeling paint.
- Long life / low cost of ownership.
- Superior resistance to regular washdowns & chemical attack due to effective & efficient sealing arrangement.
- Relubrication is possible for long trouble-free life, minimising maintenance, maximising productivity.
- Approved to NSF, temperature scale from -20°C to +90°C.

Condition Description

- Arduous Environments
- Contamination

Industries

- Chemical and Pharmaceutical
- Food and Beverage
- Material Handling
- Packaging
- Utilities
