The QM industry requires highly reliable equipment that can withstand harsh conditions. NSK has developed the first detachable seal for SRB’s. These new bearings achieve long life and have excellent sealing performance. They enable accurate management of the proper clearance during bearing assembly and prevent that dirt can enter the bearing.

**Product Features**
- Compatibility with conventional products
- Long-Life NSK material technology
- NSK sealing technology

**Benefits**
- High sealing performance
- Bolt-fastened seal holder to remove sealing during assembly
- Measurement of clearance during assembly
- 4 times longer life than conventional bearing
- Withstand harsh conditions

**Condition Description**
- Contamination
- High Load
- Lubrication

**Industries**
- Cement
- Quarrying, Mining and Construction
